

Blind Contour Line Drawing

That means don't look at your paper!

Think about using **contour line**- a line that describes the edge of an object AND **continuous line**- a line that is connected.

The face drawings turn out really funny!!

Try drawing an object around your house or challenge yourself by trying to draw someone's face. **DON'T PEEK!!**

If no one is around you can also try drawing your own face by looking in a mirror.

I promise I don't actually look like this!
